

HERA LAB

2ND ORDER SQLI

LAB 4 <#CODENAME: SELFIE FOR YOU>

eLearnSecurity has been chosen by students in 140 countries in the world
and by leading organizations such as:

THE 2ND ORDER SQLI LABS PROVIDE YOU WITH 7 CHALLENGING LABS.

1. DESCRIPTION

In the **SQL Injection second-order labs**, you have to find and exploit a SQL injection and use different techniques to bypass filters and application security mechanisms.

Once connected in the VPN, you can access the application by opening the following URL: <http://info.2ndorder.labs>

2. GOAL

Find and exploit the SQL injection vulnerability.

Also, depending on the lab number, you have to bypass filters and security mechanisms implemented by the application.

3. TOOLS

The best tool is, as usual, your **brain**. Then you may need of a:

- Web Browser
- Sqlmap
- Web proxy
